

Synergy in Representation

AMID Strategies is dedicated to serving the complex technology needs of A&Es and Security Consultants in the Physical Security and IT industries.

The rendering below clearly demonstrates how the companies we represent can become an integral part of the solutions you recommend to your clients.

These solutions work independently or synergistically, to deliver the superior technologies that your specific projects--and clients--demand.

We serve as a broad-based resource for A&Es and Security Consultants and strive to deliver a high level of professionalism and confidentiality.

radiflow
Secure Your Assets
RADiFlow develops intelligent, scalable switches for utilities and transportation, utilizing a SCADA Firewall, integrated in its ruggedized Ethernet Switch.

OnSSI
OnSSI's Ocularis is a comprehensive VMS for streaming, recording & managing an unlimited number of cameras, combining extensive PSIM functionality.

Code Blue
Code Blue offers a range of dynamic emergency communication solutions—from Blue Light Phones to advanced public address and mass notification systems—for a complete end-to-end solution.

Commend, Inc.
Commend, Inc. provides advanced Intercom 2.0 technologies for control terminals, modules and intercom stations for speech, image and data transfer, in healthcare, transportation and emergency services.

Altronix®
Altronix offers a comprehensive line of Security, Fire, CCTV, Access, Nurse Call & Automation products, incorporating cutting edge design and engineering.

BriefCam
BriefCam provides video synopsis technology for rapid browsing and indexing of captured video, at rates of up to 1000 times faster than is currently achievable.

Seneca
Seneca creates solutions to simplify technology for business, education, healthcare, digital signage, digital security and surveillance, and digital broadcast customers nationwide.

HITACHI
Inspire the Next
Hitachi Visualization aggregates data from multiple sensors into a common live operating picture, providing full situational awareness to support incident management and investigation.

SAMSUNG TECHWIN
Samsung Techwin's imaging technology covers diverse applications including Access Control and Intruder Detection, protecting cities, airports, seaports, industrial areas and military installations.

iluminar
Iluminar provides infrared and white-light LED illuminators, LPR cameras, lighting fixtures and related products, for the security, commercial and industrial lighting market.
